Customer Satisfaction - Online Survey

We invite you to participate in our new customer satisfaction survey on our corporate homepage. Here you can evaluate our performance with regard to products, sales, order transaction & delivery, as well as our after sales service & technical support.

Your opinion is important for us and helps us to improve and better adapt our internal processes to your needs. In a yearly workshop we analyze the results of the survey and decide on appropriate improvement measures we can implement.

Please [click here](#) to participate in our online customer satisfaction survey. We are looking forward to your feedback.

INDUSTRONIC – We value your opinion!

CURRENT TOPICS

INDUSTRONIC Now Certified According to the SCC Standard

Safeguarding the health of our employees has always been a top priority for INDUSTRONIC. Now our safety, health and environment management system is also certified according to the SCC (=Safety Checklist Contractors) standard. After the successful audits of our customer service center in Dormagen and our headquarters in Wertheim we obtained the unrestricted

SCC^P certificate for the petrochemical industry in October 2013.

This way, we can meet the ever-increasing safety requirements of our customers. Our highly qualified service staff can now also be deployed in plants and on sites where the SCC certificate is mandatory.

Please click [here](#) to view our certificate.

If you want to obtain further information on this topic, be sure to visit [Global Dialog](#), INDUSTRONIC's corporate blog, where you'll find an article on the SCC certification in the next few days.

INDUSTRONIC – Reliable – Safe – SCC-certified

TRAINING

Now Online: Our Training Dates for 2014

We offer training courses for the INTRON-D and INTRON-D *plus* communication systems. You can choose between basic or advanced courses. Our highly qualified trainers tailor the training courses to your personal know-how for you to gain individualized insights into the operation and functions of our products.

We are happy to announce the new dates for our product and hands-on training courses. Visit our website or click on the following link: [INDUSTRONIC Training](#)

We look forward to receiving your registration!
